## THE BENEFICIAL ACTION OF ANCIENT ROMAN SPAS

**In their famous charcoal-heated spas, the ancient Romans used sophisticated thermo-hydraulic technology to channel hot water and irradiate steam and heat through the spas' floors and walls.**

**They knew that the administration of suitable quantities of heat at various humidity levels produced surprising health benefits as well as an overall sensation of well-being and relaxation.**

**To reach these results, the Romans designed complex architectural structures consisting of various halls laid out in a specifically effective sequence.**

**Raxul cabin recreates in sequence all of the bio-climatological stages of the ancient Roman spa in a single room and perfects the Ancient Roman Spa ritual by developing a total wellness concept i Z[LZ Ua\_ T[ W i [fZ S dS` YWof emotional cosmetics S\_ b[X]e the good vibes generated by the Raxul cabin! # RAXUL

## TOTAL WELLNESS TECHNOLOGY & PHILOSOPHY

In the Raxul cabin, technology has harnessed heat and water to provide the three basic spa functions: warm bath, steam bath and Roman bath.

The range of emotional cosmetics, combined with the manual skills of the beautician, complete the Raxul cabin experience with three programmed cycles: Raxul (the Mud ritual), Essentia (the Essences ritual) and Thalasso (the Tides ritual).

The wellness system is total because it involves all five senses:

**HEARING:** each Raxul cabin is fitted with a hi-fi stereo system playing relaxing ambiance music.

**SMELL:** a mix of essences and aromas inebriate the mind and the spirit.

**SIGHT:** optical fibres provide changing colours inside the cabin, to highlight the different stages of the treatment.

**TOUCH:** stone and other natural materials caress the body.

**TASTE:** the treatments are accompanied by delectable thirst-quenching herbal teas.

## SPACE IS RELATIVE

**Space, form, functionality, reliability and simplicity are the key concepts that inspired the team of technicians and experts in designing the multipurpose Raxul cabin.**

**This extraordinarily versatile, easy to use and multifunctional Raxul cabin, with its highly reliable components and materials, allows you to offer your clients a high quality Spa service.**

SPACE FORMULA:

$6 \text{ M}^2 = \text{RAXUL}$

# DESIGN & FUNCTIONS

## BASIC FUNCTIONS

### WARM BATH

BENCH AND WALLS 39°C  
 AMBIENT 35°C  
 NATURAL HUMIDITY  
 YELLOW LIGHT

Regenerating and relaxing bath. An ideal way to help strengthen the immune system, ensuring general prevention and regeneration of the body. The environment artificially creates a feverish condition, which leads to a natural increase of excess fat metabolism.

### STEAM BATH

BENCH 39°C  
 AMBIENT 45°C  
 HUMIDITY 100%  
 GREEN LIGHT

Turkish bath with heated benches. The steam helps regulate the skin's pH level and leaves it hydrated and cleansed. Recommended for improving the respiratory functions.

### ROMAN BATH

BENCH 37°C  
 WALLS 60°C  
 AMBIENT 55°C  
 NATURAL HUMIDITY  
 RED LIGHT

Ancient Roman sauna with heated benches and walls. Intense perspiration results in general detoxination of the body through the flushing out of toxins.

## HARMONISED TREATMENTS

### RAXUL CYCLE

The Mud Ritual

25 MIN.

Various kinds of mud packs are applied to the entire body and allowed to dry by raising the temperature (dry absorption). Steam is then introduced to once again humidify the mud product (absorption by osmosis). Lastly, a tropical rain scented with MARACUJA Essence comes into contact first with the product and then with the body (absorption by synergy), resulting in a gentle detoxinating and moisturising action on the deeper skin layers.

### ESSENTHIA CYCLE

The Essences Ritual

23 MIN.

This cycle offers hot steam scented with EUCALYPTUS Essence alternated with fresh Aufguss-effect mists that not only improves respiratory functions but also fosters general detoxination by helping the body flush out toxins.

### THALASSO CYCLE

The Tides Ritual

29 MIN.

This cycle begins with the preparation of the skin with steam, alternated with spurts of SALINE SOLUTION and air mixed with EUCALYPTUS essence. The cycle ends with a fresh reaction mist. The result of this cycle is an ideal synergy between pore dilation and salt absorption.

## SIMPLICITY, RELIABILITY AND VERSATILITY

The development of the Beauty cabins has enabled the achievement of extraordinary levels of quality featuring user friendly operation and simple maintenance.

The basic functions – warm bath, steam bath and Roman bath – may be activated at any time according to the requirements of the various beauty treatments.

Moreover, the three programmed harmonized treatments allow automatic management of all treatment phases.

## NATURAL ELEMENTS

Stone, steel, wood and glass are all skilfully brought together to give life to an object of extraordinary design. Natural materials which, with the complicity of water and heat, generate feelings of timeless pleasure and serenity.

The high-quality stone used to line the interior of the cabin possesses qualities of compactness, low porosity and high refractive power, thus ensuring low absorption of the vapours and high heat performance during the treatments.

Wall lining: Belgium Blue marble, with its inimitable blue colour.

Seats: Botticino marble, with extraordinary amber-coloured veining.
